EDUCATION

Queen's University Belfast

MSc – Applied Cyber Security

Belfast, UK

Sep 2025 – Expected Sep 2026

Grade: 3.7/4.0 | **Coursework:** Network Security & Monitoring, Pen-testing, Cyber-AI, Software Assurance, Cryptography.

Dissertation: Design of a Botnet Detection Application using eBPF.

Visvesvaraya Technological University

Bachelor of Engineering – Computer Science and Engineering

INDIA

Aug 2019 – Jul 2023

Grade: 7.7/10

EXPERIENCE

Kyndryl

Graduate DevSecOps Engineer

Bengaluru, IN

Sep 2023 – Aug 2025

- Enforced cloud governance and access control across Azure tenants via Microsoft Entra ID, implementing RBAC role assignments, conditional access policies, user provisioning, and periodic access reviews to maintain least privilege.
- Automated infrastructure provisioning across Azure and AWS using Terraform and Terraform Cloud for repeatable, auditable deployments across subscriptions.
- Architected and managed 100+ end-to-end CI/CD pipelines in Azure DevOps across DEV, PRE-PROD, and PROD, automating build, test, and release workflows and cutting deployment cycles by 80% (40 hrs to 8 hrs).
- Integrated security and compliance gates into CI/CD pipelines using Checkmarx SAST/SCA, detecting and remediating findings early and enforcing organisational security standards throughout the SDLC.
- Led the zero-downtime migration of 3 legacy applications serving 100,000+ corporate and commercial customers from TFS to Azure DevOps, establishing Git branching strategies across distributed development teams.
- Containerised microservices with Docker and orchestrated workloads on Kubernetes; monitored application and infrastructure health using Prometheus and Grafana.
- Contributed to HLD/LLD DevSecOps design, internal developer platform, and AI infrastructure initiatives; led DevSecOps knowledge-sharing sessions and took part in DevSecOps maturity assessments.

PROJECTS

- **SBOM Vulnerability Analyzer** – Supply-chain security tool that ingests CycloneDX or SPDX SBOMs and enriches every CVE with EPSS exploit probability, CISA KEV flags, and ATT&CK mappings; adds typosquat detection, a 0–100 risk score, and a one-version fix planner. Built with Next.js 15, React 19, Prisma, Postgres, Redis, and Docker, using OSV.dev.
- **PureSecure CWE Explorer** – Security analytics platform linking MITRE CWE, NVD CVE, CAPEC, and ATT&CK. Built on FastAPI, React, and Redis; deployed to Azure AKS via Terraform & Helm with ArgoCD, cert-manager, External Secrets Operator, and an 8-stage GitLab CI pipeline.
- **Azure SOC & Honeynet** – Cloud honeynet in Azure with Windows and Linux VMs exposed to live attack traffic; ingested logs into Log Analytics and used Microsoft Sentinel with custom KQL rules to generate attack maps and alerts. NSG, firewall, and Entra ID hardening cut incidents by 90%+.

CERTIFICATIONS

- AZ-400 – Azure DevOps Engineer Expert
- AZ-500 – Azure Security Engineer Associate
- AZ-104 – Azure Administrator Associate
- HashiCorp Terraform Associate (003)

SKILLS

Cloud & Infrastructure: Azure, AWS, Terraform, Kubernetes, Helm, Docker, Linux, Windows Server.

DevOps & CI/CD: Azure DevOps, GitLab CI, Jenkins, GitHub Actions, ArgoCD, Backstage, Git, Python, Bash, PowerShell, Prometheus, Grafana, Alertmanager.

Application Security: SAST, DAST, SCA, Checkmarx, SonarQube, Snyk, Trivy, OWASP ZAP, Burp Suite, Wireshark.

Identity & SecOps: Microsoft Entra ID, Microsoft Defender for Cloud, Microsoft Sentinel, Microsoft Defender EDR, MITRE ATT&CK.

AWARDS

Exceptional Performance & Contribution to Cloud Practice Customers

Kyndryl
