SUMMARY

DevSecOps Engineer with 2 years at Kyndryl, specialising in CI/CD pipelines, Infrastructure as Code, and cloud across Azure and AWS, with a strong grounding in cloud security. Currently completing an MSc in Applied Cyber Security at Queen’s University Belfast.

EXPERIENCE

Kyndryl
Graduate DevSecOps Engineer

Bengaluru, IN
Sep 2023 – Aug 2025

- Architected and managed 100+ end-to-end CI/CD pipelines in Azure DevOps across DEV, PRE-PROD, and PROD environments, automating build, test, and release workflows that cut deployment cycles by 80% (40 hrs down to 8 hrs).
- Led the zero-downtime migration of 3 legacy on-premises applications serving 100,000+ corporate and commercial customers to Azure DevOps; established Git branching strategies that streamlined collaboration across distributed development teams.
- Provisioned and managed multi-cloud infrastructure (Azure & AWS) using Terraform and Terraform Cloud with modular configurations and reusable modules delivering consistent, auditable deployments across teams.
- Containerised microservices with Docker and orchestrated workloads on Kubernetes (Ingress, DNS, Load Balancers); monitored application and infrastructure health using Prometheus, Grafana, and Datadog.
- Managed Identity & Access Management via Microsoft Entra ID, enforcing least-privilege access through automated user provisioning, RBAC role assignments, conditional access policies, and periodic access reviews across cloud tenants.
- Embedded Checkmarx SAST/SCA scanning into CI/CD pipelines across multiple enterprise projects, detecting and remediating vulnerabilities early to ensure compliance throughout the SDLC.
- Contributed to HLD/LLD design, reusable pipeline templates, and internal developer platform initiatives (Backstage); led DevSecOps knowledge-sharing sessions and took part in DevSecOps maturity assessments.

PROJECTS

- **PureSecure CWE Explorer** – Security analytics platform linking MITRE CWE, NVD CVE, CAPEC, and ATT&CK. Built on FastAPI, React, and Redis; deployed to Azure AKS via Terraform & Helm with ArgoCD, Traefik, cert-manager, External Secrets Operator, and an 8-stage GitLab CI pipeline (Semgrep, Trivy, CycloneDX SBOM).
- **Azure SOC & Honeynet** – Built a cloud honeynet in Azure with Windows and Linux VMs to attract live attack traffic; ingested logs into Log Analytics and used Microsoft Sentinel with custom KQL analytics rules to generate attack maps, alerts, and incidents. Applied NSG, firewall, and Entra ID hardening, reducing security incidents by over 90% across before/after measurement windows.

CERTIFICATIONS

- AZ-400 – Azure DevOps Engineer Expert
- AZ-500 – Azure Security Engineer Associate
- AZ-104 – Azure Administrator Associate
- HashiCorp Terraform Associate (003)

SKILLS

Cloud & Infrastructure: Azure, AWS, Terraform, Kubernetes, Helm, Docker, Linux, Windows Server.

DevOps & CI/CD: Azure DevOps, GitLab CI, Jenkins, GitHub Actions, ArgoCD, Backstage, Git, Python, Bash, PowerShell, Prometheus, Grafana, Alertmanager, ELK.

Application Security: SAST, DAST, SCA, Checkmarx, SonarQube, Snyk, Trivy, OWASP Top 10, OWASP ZAP, Burp Suite, OPA.

Identity & SecOps: Microsoft Entra ID, Microsoft Defender EDR, Microsoft Sentinel, Splunk, KQL, MITRE ATT&CK.

EDUCATION

Queen’s University Belfast
MSc – Applied Cyber Security with Professional Internship
Relevant Coursework: Network Security & Monitoring, Pen-testing & Ethical Hacking, Cyber-AI, Software Assurance, Cryptography.
Dissertation: Design of a Botnet Detection Application using eBPF.

Belfast, UK
Sep 2025 – Expected Sep 2026

Visvesvaraya Technological University
Bachelor of Engineering – Computer Science and Engineering

INDIA
Aug 2019 – Jul 2023

AWARDS

Exceptional Performance & Contribution to Cloud Practice Customers Kyndryl
